**INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56 and 37 CFR §1.97**

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Sir:

Submitted herewith on Form PTO-SB08 is a list of documents known to Applicant in order to comply with Applicant's duty of disclosure pursuant to 37 CFR 1.56. A copy of each listed document is being submitted to comply with the provisions of 37 CFR 1.97 and 1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any documents which is determined to be a prima facie prior art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The instant Information Disclosure Statement is believed to be filed in accordance with 37 C.F.R. 1.97(b), prior to the mailing date of a first Office Action on the merits (first scenario). If that is not the case, such as in a second scenario in which a first Office Action on the merits has been mailed before the filing of the instant Information Disclosure Statement, then either a certification or fee is required, and a certification is provided below. If neither of the first or second scenarios is the case, such as if a final Office Action or a notice of allowance has been mailed by the PTO (third scenario), then both a certification and fee are required, and in that case a certification is provided below and also the PTO is authorized to obtain the necessary fee to have the instant IDS considered, from Foley & Lardner Deposit Account #19-0741.

CERTIFICATION

The undersigned hereby certifies in accordance with 37 C.F.R. §1.97(e)(1) that items of information A3 – A7 listed on the Form PTO SB/08 submitted with this Information Disclosure Statement were first cited in a communication from a foreign patent office in a counterpart foreign application not more than three (3) months prior to the filing of this Statement. Items of information A1 is a U.S. patent and item of information is a published U.S. patent application that are counterparts to item of information A4, and item of information A2 is a U.S. patent that is a counterpart to item of information A6.

RELEVANCE OF EACH DOCUMENT

A translation of a portion of a Korean Office Action that issued June 27, 2003 with respect to a counterpart Korean patent application is provided below.

"The inventions described in all of the claims in the present application relate to microcomputers and methods for overwriting data in flash memory; however, Cited Invention 1 of Korean Unexamined Patent Application Publication 99-30334 relates to external memory devices and data processing methods, and is an invention wherein, when boot data is driven by flash memory, if

there is old boot data, it is overwritten with new data, and Cited Invention 2 of Japanese Unexamined Patent Application Publication H10-124321 relates to a method and device for downloading data to an electronic device in an invention that updates the program to a new version after generating separate versions of the program code for mutually differing device types, and so it is determined that it would be easy for an individual in the industry to invent the inventions described in all of the claims in the present application through combining the aforementioned inventions.

Although the inventions described in all of the claims of the present application have to do with microcomputers and methods for overwriting data in flash memory; Cited Invention 3 of Korean Unexamined Patent Application 00-40430 (Japanese Patent Application 98-56063, application date: 12/18/1998) has to do with a novel method and device for changing programs, which is an invention wherein a CPU that controls the overall operation of the system is provided, and after an original program is stored in memory, the version is retrieved, and, if necessary, updated to a new version, in an invention for updating, to the most up-to-date version, a flash memory in which a program is stored, and is essentially the same as the inventions described in all of the claims in the present application."

Applicant's statements regarding the Korean Office Action are based on a partial translation that Applicant's representative obtained. These statements should in no way be considered as an agreement by Applicant with, or an admission of, which is asserted in the Korean Office Action.

Applicant respectfully request that the listed documents be considered by the Examiner and formally be made of record in the present application and that an initialed copy of Form-SB08 be returned in accordance with MPEP §609.
